

The goals of this discussion section are:

1. Work on your homework group problem
2. Get familiar with Partial Differential Equations

Participation in discussion section counts as 5% of the grade. Completion of the worksheets counts as 20% of the grade. **Submit your worksheet work by February 24th at 2:59pm.**

1. As group complete Exercise 3.7 from the typed notes `Math150_Chapter3.pdf`. Do not spend the entire discussion section on it.
2. Work on your Homework 3 as a group. Take advantage of this common time to make the most of it (recall it is due by February 24th at 11:59pm). If you have started, use this time to write comments and the code. If you haven't started, take this time to get familiar with the problem and assign roles.
3. Submit your work (**only item 1.**) on Catcourses under the assignment `Worksheet 5 as a .pdf`. You will submit your work for item 2. within the assignment `Homework 3 (group)`.
